MUS 701 B (CRN 3077/89257) ...Psychology of Music will explore the many areas of research that provide insight into the ways that music affects human behavior. Through extensive readings, media and online discussions, participants will examine diverse disciplines and their inter-relationships that constitute the field of Psychology of Music . The culminating project for each student will be to develop a multi-media presentation focusing on one particular area of study.

This course offers Three Graduate Credits
